

Radar MultiView RMV-D2

Measuring 2D radar sensor for maximum door opening convenience with cost savings

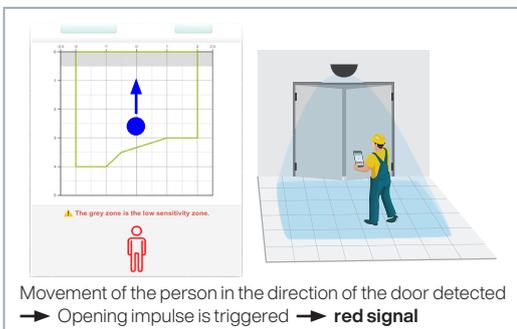

Quick Start Guide – Extended

for the configuration tool
RMV-Quick

EN

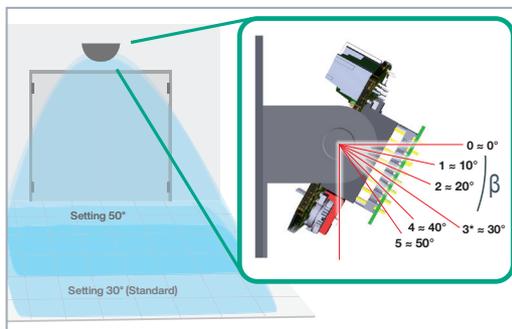

Extended Settings

11. Viewer: Function test

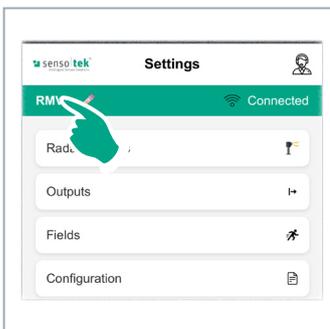

If the results in the Viewer menu do not yet meet the application-specific requirements → perform changes according to **Extended settings**.

12. Adjustment of the field of vision

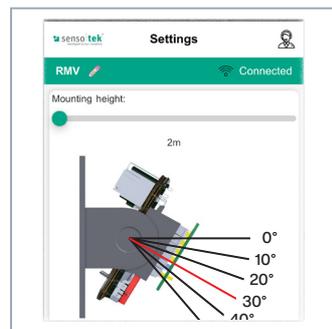

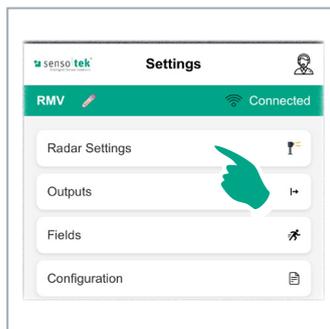

Larger field of vision → Set the angle smaller (= locking lug 2, 1 or 0. (*Standard: 3; approx. 30°). → **!!!Angle Modification!!!** = Review resulting field size.

13. Assign Name

Assign name → Click on „RMV“

14. Settings – Radar Settings

Saved settings analogous to the Guide menu → **Only edit the settings to be changed**

Change settings via Settings menu

Call up Settings via the navigation bar at the bottom

Individual entries can be corrected in the respective sub-menus. **Save changes again!**

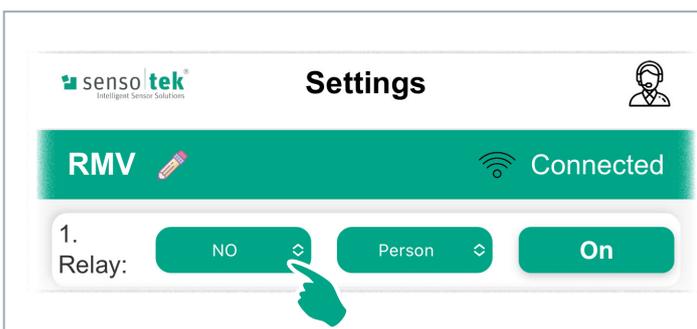

After entering all changes via the navigation below on Viewer → new Function test

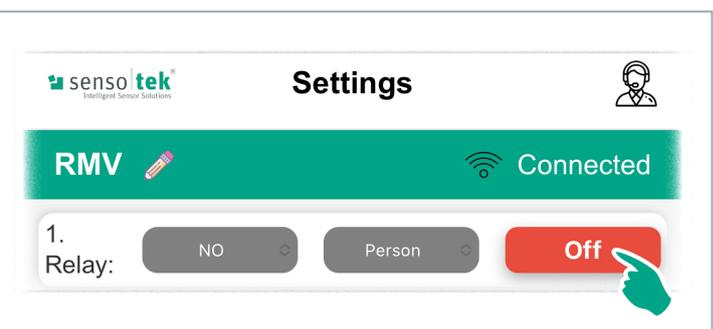

→ General change to the corresponding view via the navigation below

15. Settings – Outputs

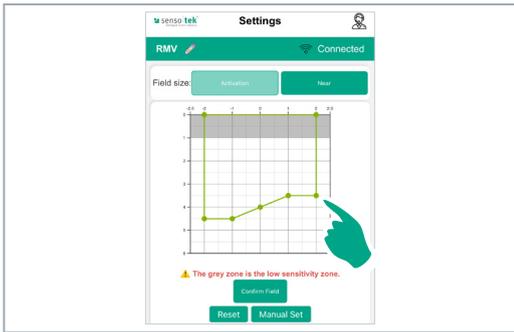

Factory setting → NO/NC, Person/Vehicle: This settings can be changed here.

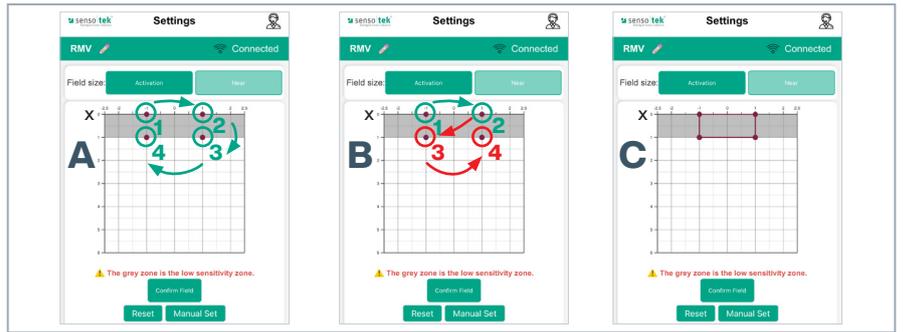

Click on the "On" button → selected relay inactive (= appears gray).

16. Settings – Fields – Activation/Near Area

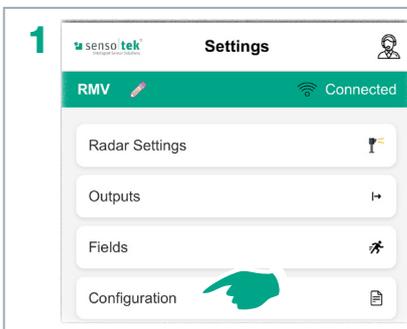

Change the **created activation area** by moving the set points.

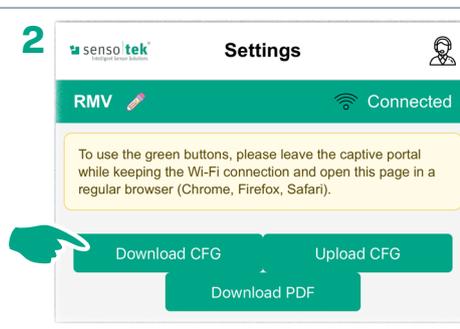

Near area: the door will open in any case in this range. Set the points analogous to the activation range: **Point 1** on the x-axis (= zero line) to the **left** of the door center, **point 2** on the x-axis (= zero line) to the **right** of the door center, set **further points** in sequence (Fig. A), **not crosswise (left/right/left... Fig. B)**! Save with **"Confirm Field"** (Fig. C).

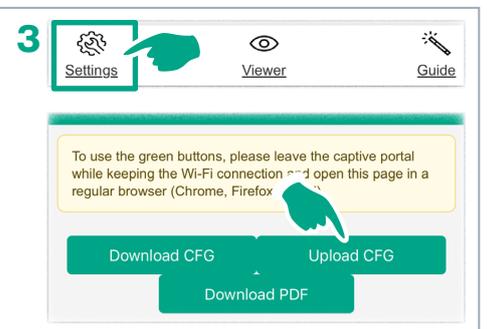

17. Settings – Configuration – Device Cloning

Installing and configuring several Radar sensors with the same requirements → Transfer the saved configuration of the first Radar to the other devices

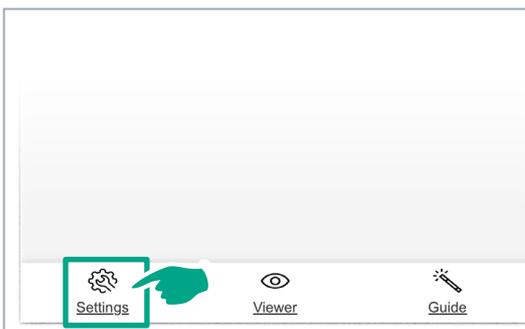

Download CFG: download the "Config.dac" file for storage on the mobile device.

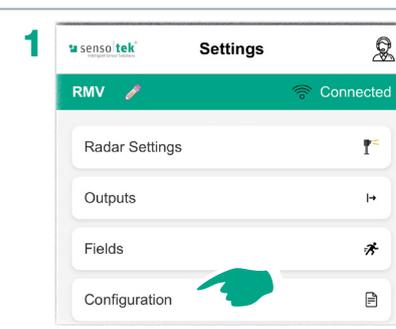

Connect to the next Radar. Select **"Settings"** in the menu below → **Window 1 (right)** appears. → click **Configuration** → click **„Upload CFG“** → upload the saved file from the mobile device to the new radar; **done**.

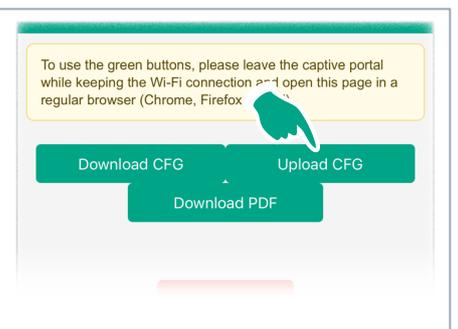

18. Settings – Configuration – Upload Existing Profile

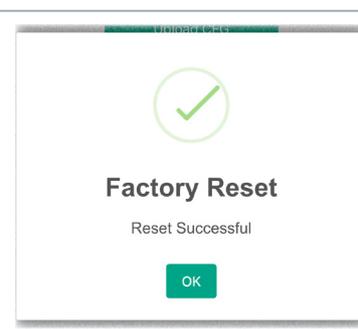

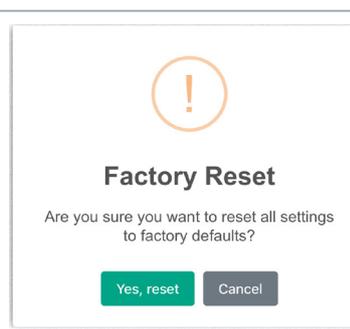

If a configuration profile already exists, it can be uploaded directly:

Select **"Settings"** in the menu at the bottom left → **Window 1 (right)** appears. → click **Configuration** → click **„Upload CFG“** → upload the saved file from the mobile device to the new Radar; **done**.

19. Factory settings

ATTENTION: Clicking the **"Factory settings"** button deletes all saved entries and resets the password → A confirmation message appears. **If this is confirmed with "Yes, reset", you will be redirected to the start page. The configuration must be carried out again from the beginning.**
